Narration Script

MAP-A rationale video v6 · how MCS comes into play · version without narration

Length 2:41 · 1920 × 1080 · 30 fps · subtitles burned in · 387 words in four scenes, then a 10-second title card with no narration. Read each line over **MAP-A_Rationale_Video_v6_MCS_No_Narration.mp4**. Each line starts when its subtitle appears, and every visual cue is tied to a word, so match your pace to the subtitles.

How to record

1. Play the video and start speaking when each subtitle appears (**Start**).
2. Finish the line by **Finish by**. **Read time** is the time the line needs at an easy pace.
3. Record each scene as its own take. Scene windows: 0:00–0:25.1, 0:25.1–0:55.7, 0:55.7–1:14.6, 1:14.6–2:31.3, then the title card 2:31.3–2:41 (no narration).
4. The boom lands at 2:16.7. Read the conclusion (4.11 to 4.13) after it, then stay silent through the title card to 2:41.
5. Pace is about 2.3 words per second, with a short breath at each comma.

Say it this way

MCS: "M-C-S", letter by letter
MAP-A: "Map A"
Dijkstra's: DIKE-struhz
Theil: like "tile"
Gini: JEE-nee
Tabaco: tah-BAH-ko
Albay: al-BYE
jeepney: JEEP-nee
Bicol: BEE-kol
e-mail: EE-mail
"test instance", never "Albay", for the S1 numbers
₱ fares, sources and table values are shown on screen only.

Scene 1 · Trip

0:00.0–0:25.1 · 63 words · bar: Mobility

#	Start	Finish by	Read time	Narration (read this) · on screen
1.1	0:00.3	0:04.8	5.2 s	**Start with one trip, from Legazpi Grand Central Terminal to Tabaco City.** On screen: A road from a terminal (A) in Legazpi to Tabaco City (B); a jeepney waits at A.
1.2	0:05.1	0:08.5	6.1 s	**Which jeepney do you ride, when do you arrive, and what do you pay?** On screen: Three chips: "Which jeepney?", "When do I arrive?", "How much?".
1.3	0:08.8	0:16.3	7.0 s	**In Albay, jeepneys, tricycles, buses, and UV Express vans publish no machine-readable routes, stops, or fares.** On screen: Four vehicle cards; a red stamp "NO ROUTE DATA".

1.4	0:16.6	0:24.4	9.1 s	**Many leave only when full, and since September 28, the base jeepney fare is 14 pesos for the first four kilometers.** On screen: Fare card "₱14.00 for the first 4 km · ₱2.00 per km after · 20% discount for students, seniors, PWD". Source: Daguno-Bersamina, 2026 (LTFRB).

Scene 2 · Community

0:25.1–0:55.7 · 74 words · bar: Access

#	Start	Finish by	Read time	Narration (read this) · on screen
2.1	0:25.5	0:27.0	2.6 s	**Zoom out to the whole province.** On screen: Albay as a field of 720 barangay dots.
2.2	0:27.3	0:34.7	6.1 s	**Albay has 720 barangays and nearly 1.4 million people in 18 cities and municipalities.** On screen: "ALBAY · 18 cities and municipalities · 720 barangays · 1,379,398 residents" (2024 Census, Proclamation No. 973, s. 2025).
2.3	0:35.0	0:43.7	11.3 s	**Bicol is one of six regions where fewer than 80 percent of people live within two hours of a public hospital that can do essential surgery.** On screen: Card "Bicol: fewer than 80% within 2 hours of essential surgery". Source: Lim et al., 2023.
2.4	0:44.0	0:52.0	8.3 s	**Target 11.2 asks for transport accessible to all, and Target 3.8 for health care people can use without hardship.** On screen: Chips "SDG 11.2 · accessible transport" and "SDG 3.8 · health care without hardship"; "SDG 10.2 · inclusion".
2.5	0:52.3	0:54.9	3.9 s	**In Albay, there was nothing to measure them against.** On screen: The chips meet over an empty chart: "no baseline data".

Scene 3 · Patient

0:55.7–1:14.6 · 59 words · bar: Health

#	Start	Finish by	Read time	Narration (read this) · on screen
3.1	0:56.0	0:57.2	1.3 s	**Now, an emergency.** On screen: An ambulance with flashing light.
3.2	0:57.5	1:03.5	9.6 s	**The nearest hospital may be full, may lack the right level of care, or may cost more than the family can pay.** On screen: Three hospitals: "FULL", "Level 1 only", "₱₱₱".
3.3	1:03.8	1:09.9	8.7 s	**The Department of Health publishes where hospitals are and how many beds they have, but not which beds are free.** On screen: Card "Published: location, bed capacity · Not published: free beds". Source: DOH Freedom of Information Unit, personal communication, September 22, 2026.
3.4	1:10.2	1:13.9	6.1 s	**So how does a crew know, in minutes, which hospital can take the patient?** On screen: "Right care · Free bed · Fair price · In minutes" with a question mark.

Scene 4 · How MCS comes into play

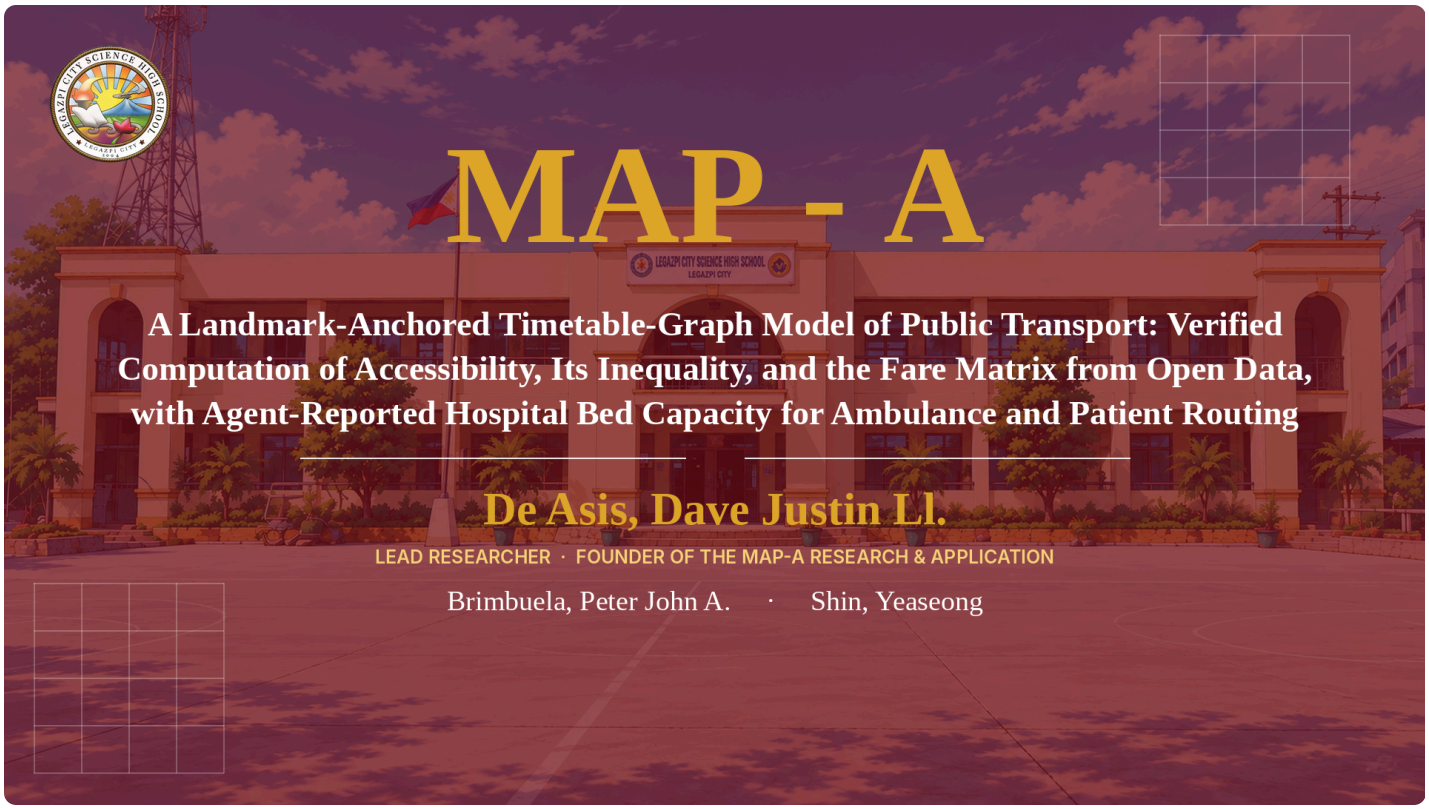

1:14.6–2:31.3 · 191 words · bar: MCS

#	Start	Finish by	Read time	Narration (read this) · on screen
4.1	1:15.0	1:17.1	3.0 s	**This is where MCS comes into play.** On screen: The letters M, C and S drop in and unfold into Mathematical, Computational, Sciences.
4.2	1:17.4	1:25.3	8.3 s	**Objective one: a timetable graph from open data that routes by arrival, fare, and transfers, within vehicle road limits.** On screen: Panel OBJECTIVE 1 · TIMETABLE GRAPH; a time-expanded graph with ride, wait and transfer arcs; ten vehicle classes.
4.3	1:25.6	1:32.1	7.0 s	**Dijkstra's search gives the exact earliest arrival, and the regulated fare is proven monotone and subadditive.** On screen: The earliest-arrival path lights gold; equations for the mean travel time and the regulated fare $f(\ell_1+\ell_2) \le f(\ell_1)+f(\ell_2)$.
4.4	1:32.4	1:40.7	9.1 s	**Objective two: measure who is left behind, with the Gini, Theil, and Palma measures, and split inequality within and between towns.** On screen: Panel OBJECTIVE 2 · INEQUALITY; a Lorenz curve; cumulative accessibility and the exact Theil split; S1: 86.0% between municipalities.
4.5	1:41.0	1:49.3	8.7 s	**Objective three: e-mail agents gather bed reports, and an early-stopping search finds the nearest hospital that can take the patient.** On screen: Panel OBJECTIVE 3 · HOSPITAL MODE; agents exchange tokened e-mails; the route skips the full hospital; suitability rule and nearest suitable hospital.
4.6	1:49.6	1:52.5	3.5 s	**In an emergency, payment never delays the route.** On screen: Badge "Acuity 1–2: payment filter off · payment gap = 0" (RA 10932).
4.7	1:52.8	1:58.0	7.4 s	**Objective four: MAP-A, one app that puts all of this on a phone, even without a signal.** On screen: Panel OBJECTIVE 4 · THE APP; a phone with the MAP-A trip planner and hospital mode; "offline".
4.8	1:58.3	2:11.7	8.7 s	**Twelve propositions, proven, then checked: 618 of 618 trips, 5,200 of 5,200 hospital queries, and all 200 forged replies rejected.** On screen: Twelve green checks; cards 618/618 earliest-arrival queries, 5,200/5,200 hospital queries, 200/200 forged replies rejected.
4.9	2:12.0	2:16.4	6.5 s	**Fifteen of the sixteen app features work, and it runs with no connection at all.** On screen: Cards 11,620 vehicle-class pairs, 0 violations · 15 of 16 checklist features working · runs offline.
4.10	2:17.0	2:18.9	3.5 s	**MAP-A will not add one bed to Albay.** On screen: Boom. Screen darkens; the line appears in white.

4.11	2:19.2	2:25.1	10.4 s	**But it will tell a rider what to ride and what to pay, and tell a crew which hospital can take the patient now.** On screen: The line appears in gold.
4.12	2:25.4	2:27.5	3.0 s	**Distance tells you where the hospital is.** On screen: "Distance tells you where the hospital is." in white.
4.13	2:27.8	2:29.9	3.9 s	**Access tells you whether it can help in time.** On screen: "Access tells you whether it can help in time." in gold.

Title card · Researchers — 2:31.3–2:41 · no narration

#	Start	Finish by	Read time	Narration (read this) · on screen
5.1	2:31.3	2:41	—	**[No narration. Stay silent; let the music and the title card play.]** On screen: the school building under a deep red overlay, the school seal top-left and a white corner grid; the gold letters MAP - A drop in one by one with a hit, then a gold shine; the full paper title in white; two thin white lines draw outward; "De Asis, Dave Justin Ll." in large gold with "LEAD RESEARCHER · FOUNDER OF THE MAP-A RESEARCH & APPLICATION"; then "Brimbuela, Peter John A. · Shin, Yeaseong" in white. Fade to black at 2:41.

Title card, final frame (also supplied as MAP-A_Title_Page_1920×1080.png and MAP-A_Title_Page_3840×2160.png).

Clean read

The same narration without the production notes. Use it as a teleprompter or to rehearse. A slash marks a short breath.

SCENE 1 · TRIP · 0:00.0–0:25.1

0:00.3 Start with one trip, / from Legazpi Grand Central Terminal to Tabaco City.

0:05.1 Which jeepney do you ride, / when do you arrive, / and what do you pay?

0:08.8 In Albay, / jeepneys, / tricycles, / buses, / and UV Express vans publish no machine-readable routes, / stops, / or fares.

0:16.6 Many leave only when full, / and since September 28, / the base jeepney fare is 14 pesos for the first four kilometers.

SCENE 2 · COMMUNITY · 0:25.1–0:55.7

0:25.5 Zoom out to the whole province.

0:27.3 Albay has 720 barangays and nearly 1.4 million people in 18 cities and municipalities.

0:35.0 Bicol is one of six regions where fewer than 80 percent of people live within two hours of a public hospital that can do essential surgery.

0:44.0 Target 11.2 asks for transport accessible to all, / and Target 3.8 for health care people can use without hardship.

0:52.3 In Albay, / there was nothing to measure them against.

SCENE 3 · PATIENT · 0:55.7–1:14.6

0:56.0 Now, / an emergency.

0:57.5 The nearest hospital may be full, / may lack the right level of care, / or may cost more than the family can pay.

1:03.8 The Department of Health publishes where hospitals are and how many beds they have, / but not which beds are free.

1:10.2 So how does a crew know, / in minutes, / which hospital can take the patient?

SCENE 4 · HOW MCS COMES INTO PLAY · 1:14.6–2:31.3

1:15.0 This is where MCS comes into play.

1:17.4 Objective one: a timetable graph from open data that routes by arrival, / fare, / and transfers, / within vehicle road limits.

1:25.6 Dijkstra's search gives the exact earliest arrival, / and the regulated fare is proven monotone and subadditive.

1:32.4 Objective two: measure who is left behind, / with the Gini, / Theil, / and Palma measures, / and split inequality within and between towns.

1:41.0 Objective three: e-mail agents gather bed reports, / and an early-stopping search finds the nearest hospital that can take the patient.

1:49.6 In an emergency, / payment never delays the route.

1:52.8 Objective four: MAP-A, / one app that puts all of this on a phone, / even without a signal.

1:58.3 Twelve propositions, / proven, / then checked: 618 of 618 trips, / 5,200 of 5,200 hospital queries, / and all 200 forged replies rejected.

2:12.0 Fifteen of the sixteen app features work, / and it runs with no connection at all.

2:17.0 MAP-A will not add one bed to Albay.

2:19.2 But it will tell a rider what to ride and what to pay, / and tell a crew which hospital can take the patient now.

2:25.4 Distance tells you where the hospital is.

2:27.8 Access tells you whether it can help in time.

TITLE CARD · RESEARCHERS · 2:31.3–2:41

[Silent. Title card: MAP-A · De Asis, Dave Justin Ll., Lead Researcher · Founder · Brimbuela, Peter John A. · Shin, Yeaseong. Ends 2:41.]
